SCHIP Reauthorization: The Road Ahead
The State Children’s Health Insurance Program: Past, Present and Future

Overview of Presentation

• A Brief History of SCHIP
• Where We Are Now
• Key Issues for Reauthorization
Factors Behind Initial Enactment

• Strong, bi-partisan support for covering America’s uninsured children
• Support for the tobacco tax increase used to finance SCHIP
• Precedent of successful state programs
• Adopted in the context of a budget reconciliation bill
Key Ingredients of SCHIP Law

- Block grant / No entitlement to coverage
- No mandates / State option with “enhanced matching funds”
- Funds dedicated to NEW coverage
- State flexibility to use Medicaid and/or a separate state program
- Significant flexibility over design of separate state programs
  - Premiums and cost-sharing
  - Benefits
  - Option to shut down enrollment
- Medicaid treated as the base off of which states would build
The Good News and the Bad News: Uninsured Children in 1997 and 2004

<table>

Trends in the Uninsured Rate of Low-Income Children, 1997 - 2005

Uninsured rate of low-income children under 18

22.6% 22.1% 21.5% 21.1% 17.8% 15.8% 15.0% 14.9% 13.5%

Source: Georgetown CCF analysis based on from the National Health Interview Survey, December 2005. Beginning in 2004, the NHIS changed its methodology for counting the uninsured. This results in the data for 2004 and later years not being directly comparable to the data for 1997 – 2003.
Impact of Eligibility on Access to Care and Use of Services

** Significant at the .01 level.

Source: Urban Institute Analysis of National Survey of America's Families (NSAF).
SCHIP’s Role in the Success Story

• Spurred major expansions in coverage for children
• Now covers some 4 million children (6 million over the course of a year)
• Reinvigorated Medicaid coverage for children
• Spurred expansive child health outreach initiatives and efforts to make it easier for families to enroll in coverage
The Federal Poverty Line (FPL) for a family of three in 2005 is $16,090.

Source: Based on a national survey conducted by the Center on Budget and Policy Priorities for KCMU, 2005.
Changes in Medicaid and SCHIP Participation Over Time

Note: Excludes children with private coverage and defined for citizen children ages 0 to 17.
Medicaid’s Role in the Success Story

- **Medicaid is the backbone of the coverage system for children**
  - Covers some 30 million children, close to nine in ten of those with public coverage
  - Guarantees federal funding to states and coverage to eligible children

- **Medicaid provides the base off of which SCHIP builds**
  - SCHIP-financed coverage begins where “regular” Medicaid stoops
  - Picks up many of the children with the most extensive health care needs
  - Provides “backup” financing for SCHIP
Table 3: Coverage Gains Over the Past Decade Have Come Equally from Medicaid and SCHIP

Source: CCF, Preliminary data. Based on children ever-enrolled over the course of a year.
3 out of 4 Uninsured Children are Eligible for Medicaid or SCHIP

- Medicaid Eligible: 53%
- SCHIP Eligible: 22%
- Not Eligible: 25%

Specific Policy Issues Likely to Emerge in Reauthorization

• How much SCHIP funding will be available?
  – Level of funding
  – Redistribution formula
  – Source of any new funds

• Who can be covered?
  – Income range of children who can be covered
  – Treatment of adults covered with SCHIP funds
  – Refinancing of pre-SCHIP expansions
  – Special groups of children (legal immigrants, state employees children)
SCHIP Spending is Rapidly Outpacing New Funds Being Made Available

Source: Data received from HHS, 2006.
SCHIP Enrollment Projections, 2007-2016

Assures federal SCHIP allotments remain at $5 billion after FY 2007

Source: The Kaiser Commission on Medicaid and the Uninsured. Additional Detail of the FY 2007 Budget from Office of the Actuary at CMS.
Selected State Coverage Choices Under SCHIP

- **States with Income Thresholds for Children above 200% FPL**: 14 states
- **States with Coverage of Prenatal Care**: 12 states
- **States with Coverage for Parents**: 7 states
- **States with Coverage for Childless Adults**: 4 states
- **States that Qualify for Buy-out of pre-SCHIP Expansion**: 11 states

* Additional states effectively cover children above 200% FPL through disregards and deductions.

Source: Data are preliminary.
Specific Policy Issues Likely to Emerge in Reauthorization (continued)

• **What kind of coverage will be provided?**
  – Changes to benchmark benefits
  – Relationship to employer-based coverage
  – Incentives to improve quality and access

• **How do we reach eligible, but uninsured children?**
  – Performance-based incentives for increasing enrollment
  – Outreach funding

• **What are the implications for Medicaid?**
Conclusion

• In conjunction with Medicaid, SCHIP has been a critical part of recent progress in covering children.

• To keep moving forward, Congress will need to address 3 critical issues in reauthorization:
  – SCHIP funding levels
  – New options and tools for moving forward on coverage
  – Keeping Medicaid strong
Key Features of SCHIP’s Financing Structure

• Capped federal funding of $40 Billion for FY98 – FY07
  – Set amount available for each fiscal year ("annual allotments")
  – Divided among the states based on a statutory formula
• State spending requirement and enhanced matching rate
  – States must spend some of their own funds to use federal SCHIP dollars
  – "Enhanced matching rate" set at 65% to 85%, depends on state
  – Relative to "regular" Medicaid, reduces by 30% the cost of providing coverage
• Redistribution system
  – States have three years to use initial allotments
  – Unspent funds are redistributed; states have up to 1 year to use
  – These basic rules have been modified multiple times
## SCHIP Cost Sharing Standards

<table>
<thead>
<tr>
<th>Service Type</th>
<th>Children Below 150% FPL</th>
<th>Children at or above 150% FPL</th>
</tr>
</thead>
<tbody>
<tr>
<td>Medicaid Expansion</td>
<td>Up to 10% of the cost of the service</td>
<td>Up to 20% of the cost of the service</td>
</tr>
<tr>
<td>Separate SCHIP program</td>
<td>$1 to $5 or up to 5% coinsurance</td>
<td>No specific limits</td>
</tr>
<tr>
<td>Most services</td>
<td>Up to $3 for a non-preferred / may charge less for preferred</td>
<td>Up to 20% of cost for non-preferred / may charge less for preferred</td>
</tr>
<tr>
<td>Prescription drugs</td>
<td>$1 to $5 or up to 5% coinsurance</td>
<td>No specific limits</td>
</tr>
<tr>
<td>Preventive services</td>
<td>No charges allowed</td>
<td>No charges allowed</td>
</tr>
<tr>
<td>Aggregate cap</td>
<td>5% of income</td>
<td>5% of income</td>
</tr>
<tr>
<td>Premiums</td>
<td>Not allowed</td>
<td>Up to $15 to $19 per month</td>
</tr>
<tr>
<td></td>
<td></td>
<td>No upper limit except 5% cap</td>
</tr>
</tbody>
</table>

*FPL* stands for Federal Poverty Level.
